Journal of Vascular Medicine and Biology

February–December 1993 Volume 4

Contents

Number 1, February 1993

Original Articles

Expression and release of smooth muscle cell mitogens in the arterial wall after balloon angioplasty 1
P. Macke Consigny and Glenda E. Bilder

The role of platelets in unstable angina: Conversion of chronic stable angina to rest angina concurrent with a rapid increase in the platelet count 9
George A. Stouffer, John E. Humphries, Robert S. Gibson, and Michael E. Williams

Effects of the potassium channel openers SDZ-PCO 400 and cromakalim in an in vivo rat model of occlusive arterial disease assessed by ^{31}P-NMR spectroscopy 14
Nigel S. Cook, Markus Rudin, Charles Pally, Stefan Blarer, and Ulrich Quast

Angiotensin-converting enzyme inhibition with cilazapril does not improve blood flow, walking time, or plasma lipids in patients with intermittent claudication 23
J. David Spence, J. Malcom O. Arnold, Claudio E. Munoz, Anne Viswanatha, Murray Huff, Guy Derose, and Kenneth Harris

Differences in the extracellular calcium requirement for contraction of the middle cerebral, coronary, and pulmonary arteries from the sheep 29
R.M. Drummond and R.M. Wadsworth

Hypotensive effect of magnesium infusion in spinocerebellar degeneration 37
Koichi Miyagawa, Masayuki Ogihara, Yasuaki Dohi, and Koichi Sato

R.M. Drummond and R.M. Wadsworth

Hypotensive effect of magnesium infusion in spinocerebellar degeneration 37
Koichi Miyagawa, Masayuki Ogihara, Yasuaki Dohi, and Koichi Sato

Effects of metformin on hemorrhagic shock, blood volume, and ischemia/reperfusion on nondiabetic hamsters 41
Eliete Bouskela and Nicolas Wiernsperger

Preservation of function of isolated blood vessels after storage 47
George C. Wellman, Theresa D. Wellman, William R. Dunn, Rosemary D. Bevan, and John A. Bevan

Number 2–3, April–June 1993

Pathophysiology of restenosis: The role of platelets and thrombin 55
Jonathan D. Marmur, Mark B. Taubman, and Valentin Fuster

A porcine model of postangioplasty "restenosis": Effects of cholesterol 64
Stephen D. Bellows, Richard A. Clugston, Robert A. Kloner, Erlinda Kirkman, Stephen N. Oesterle, Ray V. Matthews, Petar Prcevski, and Andrew C. Eisenhauer

Developmental stages of restenotic neointimal hyperplasia following porcine coronary artery injury: A morphologic review 70
Robert S. Schwartz, William D. Edwards, Allan R. Camrud, and David R. Holmes

Role of insulin in regulating vascular smooth muscle Ca^{2+}-ATPase expression 79
M. B. Zemel, A. Iannucci, and J. W. Moore

Evaluation and management of coronary artery disease in patients with significant arterial vascular disease: A review 85
Wayne L. Miller

Prevalence and correlates of lower extremity arterial disease in hypertensive patients with carotid atherosclerosis: Baseline results from the Multicenter Isradipine/Diuretic Atherosclerosis Study (MIDAS) 95
Timothy J. Wilt, Janine W. Sprinkle, John M. Flack, Cathy Heuer, Nemat Borhani, Amy Merchant, Harold W. Schnaper, William Applegate, and Richard H. Grimm

Clinical implications of vascular acting agents: Effects on insulin resistance, hypertension, and lipid metabolism 102
Norman M. Kaplan

Pulmonary arterial dynamics in congestive heart failure in humans: Significance of pulmonary arterial stiffness 105
Thomas R. Porter, David Taylor, Natesa G. Pandian, John V. Nixon, George W. Vetrovec, and Pramod K. Mohanty

S-Nitrosocaptopril: A novel nitrovasodilator resistant to nitrate tolerance 115
John P. Cooke, Bing-Yin Wang, Nancy Andon, Joseph Loscalzo, and Victor J. Dzau

Bradykinin responses in experimental vein grafts 122
Marga F. Massey, Mark G. Davies, Michael L. Klyachkin, Lewis B. Schwartz, Lizzie Barber, Richard L. McCann, and Per-Otto Hagen

Induction of C-*fos* and elastin gene in response to mechanical stretch of vascular smooth muscle cells 130
Ramesh C. Bhalla and Ram V. Sharma

Transgene expression directed by the endothelin-1 promoter is cell-type-specific but integration-site-dependent 138
Robert J. Hilkert, Suzanne de la Monte, Mu-En Lee, Jeung S. Yun, Thomas E. Wagner, and Thomas Quertermous

Role of cardiac angiotensin II in left ventricular hypertrophy in spontaneously hypertensive rats 148
Masahiro Nagano, Jitsuo Higaki, Koichi Higashimori, Hiromi Rakugi, Fumiaki Nakamura, Noriko Nagano, Ryuichi Kobayashi, Hiroshi Mikami, and Toshio Ogihara

Number 4, August 1993

Editorial

***Journal of Vascular Medicine and Biology:* The next step** 155
Mark A. Creager

Original Articles

Na,K-ATPase messenger RNA expression in spontaneously hypertensive rat aorta 156
Uichi Ikeda, Yoshio Tsuruya, and Kazuyuki Shimada

Human vascular endothelial cells grown under chornically elevated glucose exhibit altered tubulin structure and function 162
K.J. Pratt and S.K. Williams

Human vascular endothelial cells grown under chronically elevated glucose exhibit altered cell spreading and differential response to colchicine 173
K.J. Pratt and S.K. Williams

Lack of endothelial dysfunction in the young genetically hyperlipidemic JCR:LA-cp rat 186
Václav Hampl, Stephen L. Archer, James C. Russell, Daniel P. Nelson, and E. Kenneth Weir

Trends in Vascular Medicine

Influence of the structural and geometrical changes of large arteries on the level of blood pressure: Application to hypertension 196
M.E. Safer and N.O. Borhani

Preventive Cardiovascular Medicine

Viscosity and ischemic heart disease 206
Robert S. Rosenson

Interventional Forum

Compromised LIMA graft secondary to proximal subclavian artery stenosis: Treatment with endovascular stent placement 213
J. Michael Bacharach and Robert A. Graor

Vascular Grand Rounds

Recurrent pulmonary edema in a patient with atherosclerotic renal artery stenosis 216
Jeffrey W. Olin, Kishore Harjai, and Robert A. Graor

News from the Society for Vascular Medicine and Biology 221

Number 5–6, October–December

Original Articles

Failure of acute-phase reactants to aid in the diagnosis of Takayasu's arteritis 223
Michael R. Jaff, Jeffrey W. Olin, and Jess Young

Lipid and fatty acid distribution in nonulcerated and ulcerated human aortic plaques 228
C.V. Felton, D. Crook, M.J. Davies, and M.F. Oliver

Effects of antihypertensive treatment on endothelial structure and endothelium-dependent relaxation in aortae of stroke-prone spontaneously hypertensive rats 235
Satoru Sunano, Hiroyuki Itoh, Noritaka Isogai, Shoko Osugi, Kazuo Yamamoto, and Keiichi Shimamura

Responses of experimental vein grafts to endothelin-1 243
Mark G. Davies, Michael L. Klyachkin, Marga F. Massey, Einar Svendsen, and Per-Otto Hagen

Insulin inhibits vasopressin-elicited contraction of vascular smooth muscle cells 250
Jeffrey L. Ram, Maan A. Fares, Paul R. Standley, Lashawn L. Therrell, Rama V. Thyagaranjan, and James R. Sowers

The effects of cigarette smoking and smoking cessation aids on transcutaneous oxygen levels 256
Michael A. Ricci, Cory Fleishman, and Neil Gerstein

No loss of action with the nitrate-like substance molsidomine during established nitrate tolerance 260
Andrea Beyerle, Günter Lehmann, Günther Reiniger, and Werner Rudolph

Trends in Vascular Medicine

The effects of antihypertensive treatment on vascular disease: Reappraisal of the evidence in 1993 265
Stephen MacMahon and Anthony Rodgers

The asymptomatic carotid stenosis: Medical or surgical management 272
D. Eugene Strandness, Jr.

Preventive Cardiovascular Medicine

Atherosclerotic renovascular disease causing end-stage renal disease: The case for earlier diagnosis and therapy 277
Lionel U. Mailloux

Echocardiographic assessment of the left ventricle in hypertension: Perspectives on epidemiologic studies and clinical trials 285
Philip R. Liebson

Interventional Forum

Comparison of tPA and urokinase for peripheral arterial thrombolysis 311
Robert A. Graor, Jeffrey W. Olin, and Michael Bacharach

Vascular Grand Rounds

Heparin-induced thrombocytopenia 315
John R. Bartholomew

Upper extremity deep vein thrombosis: case report and review 322
James H. Stewart
